THE EASIEST AND MOST EFFECTIVE WAY
TO GET THE JOB DONE RIGHT, EVERY TIME.

GO AHEAD

t o w a w a y

Small vehicles, but a huge amount of calls? Take the bull by the horns and take on even bigger jobs with confidence.

With the **10,000 -TB SERIES**, rest assured you are backed by a compact unit built to quality standards for high performance excellence.

WORRY-FREE: Designed to deliver the same toughness and durability as our industrial models, the 10TB's oversized components and optional galvanized finish mean you spend more time on the road while keeping maintenance costs to a new low.

MORE PAYLOAD: 10TB carriers are capable of handling any call you get, from low riding sports cars to SUVs or light trucks. Consider our light extruded aluminum deck, which is both strong and yet can significantly increase your payload.

OUR 10TB SERIES carriers are always ready to roll... for the action that brings the money rolling in.
